

Lead your World the way it has to be !

It pays to be Professional

SASP PREMIUM

SASP Basic

It pays more to be Perfect !

The Automatic shoe polishing machines are provided for continuous professional use like corporates, hotels, educational institutions, administration offices, etc.

This works on the principle of infrared system. When the user inserts the shoe, the sensor is activated and the soft brushes start rotating automatically removing the dust from the shoes. Now, Press the shoe against nozzle of the cream polish dispenser and hold it under the black or brown brush. In just 30 sec we get well polished, shiny and sparkling shoes.

SASP BASIC
